## WATER TOWER MAINTENANCE

Throughout September the water tower is being relined, inside and out, to increase its useful life. Residents will notice pressure fluctuations in the system as a result of this routine maintenance. The wet weather has delayed the project; therefore, residents are requested to continue to lower their water usage to minimize the impact on the water treatment plant.

Some tips to reduce consumption include:

- Shorter showers
- Turn off the faucet when not directly using water
- Run washing machine and/or dishwasher only as necessary and with a full load
- No outside watering

## DATES TO REMEMBER!
